

Software Sustainability: ASCR's Perspective

Saswata Hier-Majumder, ASCR
10/13/2022

Recommendations for ASCR's Software Stewardship

[ECP Transition Report, 2020](#)

“We recommend that ASCR build a **shared software stewardship program** to leverage and build on the ECP developed ecosystem **to develop, curate, harden, and distribute software** essential for effective use of HPC systems.”

[CHIPS and Science Act, 2022](#)

“**It is the sense of Congress that** the Exascale Computing Project has successfully created a broad ecosystem that provides shared software packages, novel evaluation systems, and applications relevant to the science and engineering requirements of the Department, and that **such products must be maintained and improved in order that the full potential of the deployed systems can be continuously realized.**”

[Future of Advanced Computing Ecosystem Strategic Plan, 2022](#)

Strategic objective involves considering advanced computing ecosystem as a **strategic national asset**, spanning Government, academia, nonprofits, and industry.

U.S. DEPARTMENT OF
ENERGY

Office of
Science

ASCR Activity, FY 22

RFI on software stewardship

- On October 29th, 2021, ASCR released an RFI. The RFI details the potential scope of stewardship activities.
- 37 independent responses were received.
- Stakeholders include ECP, US Research Software Association, national laboratories, nonprofit organizations, small businesses, and large companies.
- Independent responses to the RFI can be found at <https://doi.org/10.2172/1843576>
- The RFI detailed the scope of software stewardship activities across areas such as governance model, technological barriers, software dependency, leveraging workforce diversity, and infrastructure requirements.
- See [Hal Finkel's ASCAC presentation](#) for a summary of the RFI responses.

ASCR Activity, FY 23

ASCR has announced an open call on maintenance of software ecosystem
<https://science.osti.gov/ascr/Funding-Opportunities>

[FY 2023 Continuation of Solicitation for the Office of Science Financial Assistance Program](#)

Announcement Number: DE-FOA-0002844

Post Date: Friday, September 30, 2022

Close Date: Saturday, September 30, 2023

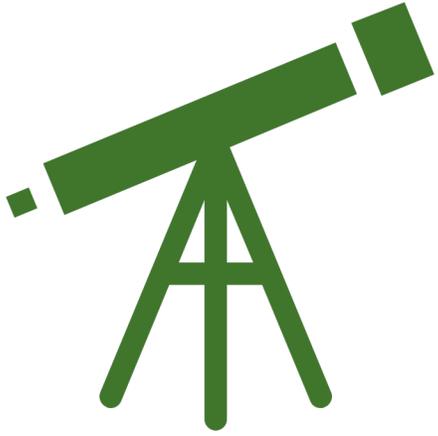

- Submission Deadline for Pre-Applications:
 - A Pre-Application is optional/encouraged
- Submission Deadline for Applications: Not Applicable

This FOA will remain open until September 30, 2023 or until replaced by a successor FOA. Applications may be submitted any time during that period.

Open Call, FY 23

- Research topics currently of interest for Advanced Computer Technology (ACT) include:
 - The **maintenance and improvement of the software ecosystem**, including that developed through the Exascale Computing Project (ECP), **which provides shared software packages, novel evaluation systems, and applications relevant to the science and engineering requirements of DOE**, in order that the full potential of the current and future computing systems deployed by DOE can be continuously realized.

Information on the open call

Long-term vision

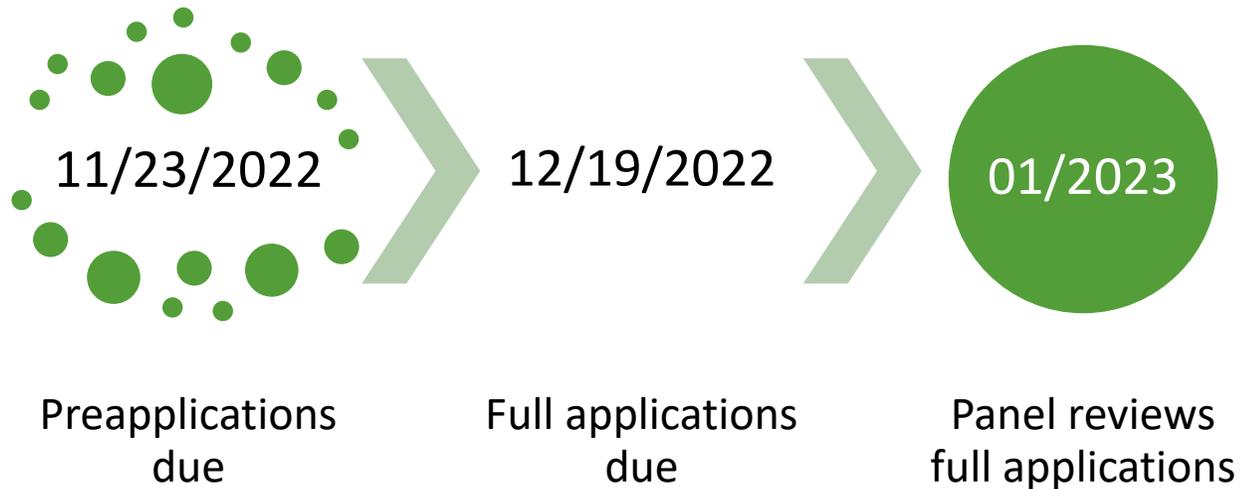

Applications for sustainability collaborations should **articulate a long-term vision for sustaining a substantial part of the ecosystem** of software for scientific and high-performance computing, and should describe **how their efforts might be rapidly scaled up in the future**.

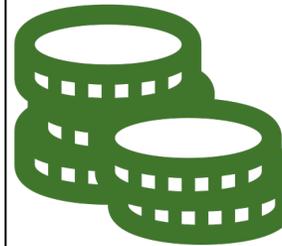

Collaborations

Applicants should think creatively about how to meet the long-term needs of the software ecosystem, including stakeholders who may need paid commercial support, and about **potential partners**, including national laboratories, academic institutions, nonprofit organizations, and businesses of all sizes.

Information on the open call*

ASCR anticipates selecting 3-5 awards

Applicants should request for **no more than \$125,000** for a **one-year** award
